The Login System for our application allows entry into the application to certain designated pages. Depending on certain input values access is granted or not.

Constraints:
1. Successful login requires you register & enter credentials that user registered with
2. Access to important pages is only given if a user is logged in if not they are prompted to log in
3. If user forgot password they can request a new password if they enter email address they registered with
4. If user is logged in, they can only manipulate the data they have entered

Login System

Decision Table

	TC1	TC2	*TC3	TC4	TC5
C1	1	1	1	1	1
C2	1	1	1	1	1
C3	1	1	0	0	0
C4	0	0	0	1	1
C5	0	0	0	0	1
C6	0	0	1	1	1
EF1	1	1	1	1	1
EF2	1	1	0	0	0
EF3	0	0	1	1	1
EF4	0	0	0	0	1
EF5	1	1	0	0	0

C1: Register successfuly
